

Patient Consent Form for AI Dictation

Consent for the Use of Artificial Intelligence in Medical Documentation

Purpose of the Consent Form

This Patient Consent Form is designed to inform you about the use of artificial intelligence (AI) technology for medical dictation and documentation purposes during your treatment or medical consultation. It ensures that you understand how AI will assist in generating accurate medical records while protecting your privacy and confidentiality.

What is AI Dictation?

AI dictation involves the use of advanced artificial intelligence systems to transcribe and document medical discussions between healthcare providers and patients. This technology is used to improve efficiency and accuracy in medical records, allowing healthcare providers to focus more on patient care.

Benefits of AI Dictation

- **Enhanced Precision:** AI technology minimizes errors in documenting medical records, ensuring accuracy in diagnoses, treatment plans, and follow-ups.
- **Improved Efficiency:** Reduces the time spent on manual note-taking and administrative tasks, giving healthcare providers more time to dedicate to patient care.
- **Accessibility:** Offers quick access to well-organized medical records, which facilitates continuity of care.

How AI Dictation Works

During your medical consultation, an AI-enabled system will transcribe the verbal interactions between you and your healthcare provider into written medical documentation. The healthcare provider will subsequently review and verify the accuracy of the information before it is added to your official medical record.

Confidentiality and Data Security

We value your privacy and confidentiality. The AI dictation system complies with all applicable regulations, including HIPAA (Health Insurance Portability and Accountability

Act), to ensure the security and protection of your personal health information. All data is encrypted and stored securely, and only authorized personnel will have access to your medical records.

Potential Risks

While AI dictation technology is designed to be accurate and secure, there are potential risks to consider:

- **Data Breach:** Although stringent measures are in place, there is a minimal risk of unauthorized access to your data.
- **Misinterpretation:** AI systems may occasionally misinterpret complex medical terms or accents. However, all records are reviewed by your healthcare provider to ensure accuracy.

Your Rights

- You have the right to decline the use of AI dictation technology and request alternative documentation methods, such as manual notetaking.
- You may ask questions or request further clarification about the AI dictation process before giving your consent.
- You can withdraw your consent at any time without affecting the quality of your medical care.

Consent Statement

By signing this form, you acknowledge that:

- You have been informed about the use of AI dictation technology and its purpose in your medical documentation.
- You understand the benefits and potential risks associated with this technology.
- You consent to the use of AI dictation for documenting your medical consultations and records.
